# PRODUCT TECHNICAL SHEET

## Balcony profile FLEXI

### Short specification

Balkónový profil z Al

### Technical parameters

Length: 2.5 m

Colour: natural

Material: Al, 1.3 mm thick

Overhang: 45 mm

Package: box 40 pcs., roll 5 pcs.

The recommended processing temperature is between + 5 °C to 35 °C. Store in dry environment and in horizontal position - to prevent bending.

### Material

ALUMINIUM (AL) natural

Al material: EN A W 6063 T66, Processing standard: ISO 2768-mk, Tolerance: EN 755-9

The oxidation layer or the darkening of the material results from the effects of air, moisture and alkaline substances. This may be removed with commercially available polishing preparations for this material. After cleaning, these effects may reappear on the surface.

### Application

Balcony profile Flexi - is a unique profile on the market with balcony profiles for edge finishing of balconies and terraces with curved shape with placement on completed screed fall. The finishing edge height is 9 mm. It is suitable for construction compositions with one or two component elastic hydro insulation or with separation foil CS. Profile can be bent to a required radius with special bending tool. With the use of sealed edges we get clean and perfect finishing of tiling with curved shape. Profile may be combined with Balcony profile STRAIGHT (PRIAMY).

**Note:** Technical sheet and information specified therein result from our verified tests, long-term experience, knowledge and field use. Celox spol. s r.o. is not responsible for damages caused by incorrect use of the product. Subject to changes.
